410 W. Broadway is a prime shovel ready development site on the west side of Mt. Pleasant's downtown with ready access to municipal utility services. The site fronts on the Chippewa River and is located between the historic Borden Building (City Hall) and an active railroad track operated by Great Lakes Central Railroad. Adjacent to the site on the west side is the Mountain Town Station restaurant and craft brewery.

Across the river and accessible by the historic Oak Street foot bridge is Island Park, one of the City’s premier park destinations. The 1.4 acre parcel is zoned C-2, which allows mixed use development and up to 75 feet of height by right. The City’s expectation is for a mixed use, multi-story development using durable exterior materials in keeping with its downtown location.

A first floor commercial tenant has been identified who is committed to needing at least 7,500 square feet. There are no minimum parking requirements for this site due to its downtown location and close proximity to 195 public parking spaces.

The property is located above the 100 year flood plain. A recently completed residential target market analysis is available to assist with the justification of housing type needs and potential market rates specific to the community.
Incentive Programs:

The City will work with interested developers to pursue appropriate incentives related to the proposed development.

Appropriate incentives could consist of Michigan Community Revitalization Program, Community Development Block Grants or a combination thereof.

Local assistance may also be available depending on the type of development and amount of investment.

City of Mt. Pleasant Accepting Development Proposals

Background

The Economic Development Corporation (EDC) of the City of Mt. Pleasant is currently accepting proposals from firms with an interest in the redevelopment the vacant parcel of property located at 410 W. Broadway (adjacent to 320 W. Broadway [City Hall]) in Mt. Pleasant known locally as “Parcel B.” This approximately 1.4 acre site is situated in the downtown area of Mt. Pleasant with frontage on the Chippewa River to the north, and Broadway Street on the south. This notice contains specific information for submitting proposals. Attached to this announcement are Conceptual Development Guidelines that outline the type of development proposal the City has expressed an interest in seeing on the parcel. The Conceptual Development Guidelines should be viewed as principles and not as absolute requirements. If there are any specific types of information or questions you have while developing your proposal, feel free to contact:

William Mrdeza  
City of Mt. Pleasant  
320 W. Broadway  
Mt. Pleasant, MI 48858  
(989) 779-5311  
wmrdeza@mt-pleasant.org

The EDC will be accepting proposals for consideration and review until such time as the EDC enters into a formal agreement to develop the site. The EDC Board reserves the right to invite applicants of qualified proposals for an interview and presentation after receipt and review of the proposal by staff. It is expected that proposal presentations will be no more than 30 minutes in length, not including questions and answers. All proposals received will be evaluated equally regardless of when they are received. The EDC reserves the right to reject any and all proposals, to waive irregularities and nonconformities in proposals, to select the proposal it believes, in its sole discretion, to be in the best interest of the City, and to negotiate with one or more applicants.

The EDC Board has also reserved the right to offer a limited-time exclusive development agreement to an applicant submitting a credible proposal that has a high likelihood of being developed, but needs additional time to perform due diligence activities. Such an agreement would allow time for the firm to more fully develop their concept if necessary or perform additional due diligence activities in response to the EDC’s input prior to a final commitment being made on the proposal. In addition, the City can provide the name and contact information of a local commercial business interested in potentially relocating to this location and which needs at least 7,500 square feet of space. Please contact Mr. William Mrdeza at the number or address listed above for more information on this opportunity.
Additional Information

At a minimum, proposals should contain the following information (in no particular order):

- Total project and site investment cost
- Total square footage proposed for the project
- Projected project financial plan including project financing, pro formas, sources and uses of funds, and any anticipated City incentives to be requested (both type and amount)
- Proposed or conceptual building elevations
- Proposed overall site plan
- Proposed uses or future tenants for the project
- Projected number of jobs during construction and permanent new jobs created as a result of the project (if known)
- Anticipated number of housing units created and number of bedrooms per unit proposed
- Targeted rental rates or sale price for housing units
- Willingness to purchase the site and proposed purchase price
- Anticipated project start date and projected project timeline from start of construction to project completion
- Brief background and qualifications of all principal developers and contractors expected to participate in the project

All information in proposals, if labeled as CONFIDENTIAL, will remain confidential to the extent permitted by law. A total of 15 copies of any written material should be submitted as part of the proposal packet. Should you be invited to present your proposal to the EDC Board, audio visual equipment will be made available to accommodate your presentation, if required, with adequate advance notice of your specific needs. Any questions or requests for additional information can be directed to William Mrdeza at the contact information listed above.
Parcel B Conceptual Development Guidelines

The following represents an example of the development guidelines originally envisioned for Parcel B, adjacent to and west of Mt. Pleasant’s City Hall. The parcel has several prime attributes the City feels should be maximized due to the unique nature of the parcel and its potential to contribute to and benefit from a growing, vibrant downtown. These guidelines were originally developed to set parameters for the future development of this unique site as part of the Broadway Revitalization Project which included renovation of the Historic Borden Building. While the original 2006 proposal/concept was not built as envisioned, the site’s proximity to downtown, the growing need for a niche residential housing market close to downtown, and its location adjacent to the Chippewa River and one of the City’s premier public parks (Island Park), make it a remarkable location for the appropriate design.

Elements the City is looking to capture in any future development proposal include the following:

- A residential component close to the downtown area.
- A building (or buildings) that would be multiple stories and be of a height, mass, and appearance compatible with the Historic Borden Building next door (City Hall).
- A project that results in significant investment that generates taxable value to the City. Potential incentives available from the City will be dependent on the level of investment and resulting taxable value projected to be generated upon project completion.
- Parking on site. Developments that incorporate a lower level parking deck as part of the design (if feasible and as envisioned in the original project) would be favorably looked on. Other parking available for the site includes on-street along Broadway, the public parking lot located across the street, and spaces available in the Borden Building’s public lot.
- The project should strive to bring new jobs to the community, new consumers to the area, and new residents to the downtown as opposed to relocating an existing use from elsewhere in the City.
- Mixed use developments would be preferred, especially those that capitalize on off-hours when parking at City Hall is more generally available. An example of this would be a mix of retail and residential units that typically have parking requirements during different times of the day.
EXISTING FLOOD PLAIN ELEVATION 753.00

1.0 INTRODUCTION

The City of Mt. Pleasant (the Client & User) retained AKT Peerless Environmental & Energy Services (AKT Peerless) to conduct a Phase I Environmental Site Assessment (ESA) of Parcel “B” located at 320 West Broadway Street, in the City of Mt. Pleasant, Isabella County, Michigan (subject property). This Phase I ESA was conducted in accordance with: (1) the United States Environmental Protection Agency (USEPA) Standards and Practices for All Appropriate Inquiries [(AAI), 40 CFR Part 312] and (2) guidelines established by the American Society for Testing and Materials (ASTM) in the Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process / Designation E 1527-05 (ASTM Standard Practice E 1527-05).

1.1 PURPOSE

The purpose of this Phase I ESA was to evaluate the current and historical conditions of the subject property in an effort to identify recognized environmental conditions (RECs)\(^1\) and historical recognized environmental conditions (HRECs)\(^2\) in connection with the subject property. Moreover, certain users of this Phase I ESA may be able to satisfy one of the environmental due diligence requirements to qualify for the bona fide prospective purchaser, contiguous landowner, or innocent landowner liability protections available under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, the Superfund Amendments and Reauthorization Act (SARA) of 1986, and the Small Business Liability and Brownfield Revitalization Act (Brownfield Amendments) of 2002. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs and HRECs in connection with the subject property.

1.2 SCOPE OF SERVICES

AKT Peerless’ scope-of-services is based on its Proposal Number PS-14143.1, approved by the Client on December 7, 2012, and the terms and conditions of that agreement. This Phase I ESA included the following:

\(^1\) ASTM’s Standard Practice E 1527-05 defines the term REC as the presence or likely presence of any hazardous substance or petroleum product on a property under conditions that indicate (1) an existing release, (2) a past release, or (3) a material threat of a release of a hazardous substance or petroleum product into structures on the subject property or into the ground, groundwater, or surface water of the subject property.

\(^2\) ASTM defines the term HREC as an environmental condition which in the past would have been considered an REC, but which may or may not be considered an REC currently. Neither HRECs nor RECs are intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.
• An inquiry of environmental conditions by an environmental professional.
• A review of specialized knowledge reported by the Client.
• A review of public and historical records, including those maintained by federal, state, tribal, and local government agencies.
• Interviews with regulatory officials and personnel associated or knowledgeable with the subject property, including as appropriate past and present owners, or neighbors if the property is abandoned.
• A reconnaissance of the subject property and adjoining properties.

1.3 PROJECT RESOURCES
AKT Peerless referred to the following resources between December 7, 2012 and December 19, 2012 to complete its ESA:

• USEPA, Region 5
• United States Geological Survey (USGS)
• United States Department of Agriculture (USDA) Soil Conservation Service
• Michigan Department of Environmental Quality (MDEQ)
• Central Michigan District Health Department
• Mt. Pleasant Government Sources (e.g., assessing, building, fire, engineering departments, etc.)
• Environmental Data Resources, Inc. (EDR)
• Interviews and Questionnaire Responses

1.4 SIGNIFICANT ASSUMPTIONS
During this Phase I ESA, AKT Peerless made the following significant assumptions:

• AKT Peerless assumed that the information provided by EDR in the regulatory database report is an accurate and complete representative summary of the information contained in the referenced regulatory agency records, except when such information is obviously contradicted by other data.
• AKT Peerless assumed that the information used to prepare this assessment that was obtained from ostensibly knowledgeable individuals, regulatory agency representatives, or other secondary sources was an accurate and complete representative summary of the information possessed by those individuals, representatives, or sources.

1.5 LIMITATIONS AND EXCEPTIONS
A list of general limitations and exceptions typically encountered when completing Phase I ESAs is provided in Appendix A. Along with the inherent limitations set forth in various sections of ASTM Standard Practice E 1527-05 and the USEPA AAI Standard, the accuracy and completeness of this report may also be limited by the following project specific facts or conditions:
• Visual observations of the subject property were limited by the presence of snow cover during the time of the inspection.

Subject to the general limitations and exceptions listed in Appendix A and the referenced terms and conditions, AKT Peerless accepts responsibility for the competent performance of its duties in executing this assignment and preparing this report in accordance with the normal standards of the profession, but disclaims any responsibility for consequential damages.

Should additional information become available to the Client that differs significantly from our understanding of conditions presented in this report, AKT Peerless requests that such information be forwarded immediately to our attention so that we may reassess the conclusions provided herein and amend this project’s scope of services as necessary and appropriate.

1.6 SPECIAL TERMS AND CONDITIONS
To the best of AKT Peerless’ knowledge, no special terms or conditions apply to the preparation of this Phase I ESA.

1.7 USER RELIANCE
AKT Peerless performed this Phase I ESA for the benefit of the City of Mt. Pleasant. AKT Peerless acknowledges that this party may rely on the contents and conclusions presented in this report. Unless stated otherwise in writing, AKT Peerless makes no other warranty, representation, or extension of reliance upon the findings of this report to any other entity or third party.

2.0 USER AND/OR CLIENT PROVIDED INFORMATION

2.1 TITLE RECORDS
The Client did not provide recorded land title records to AKT Peerless.

2.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS
The Client did not report any: (1) environmental cleanup liens against the subject property that are filed or recorded under federal, tribal, state, or local law; or (2) activity and use limitations (AULs), such as engineering controls, land use restrictions or institutional controls, that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law.

2.3 KNOWLEDGE OF THE USER
With the exception of the previous environmental investigations, described in section 4.4.5, the Client did not report specialized knowledge or experience, actual knowledge, or commonly known or reasonably ascertainable information that is material to identifying RECs in connection with the subject property.
2.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

The Client did not report knowledge of, or reason to anticipate, a reduction in the value of the subject property for environmental issues.

2.5 REASON FOR PERFORMING THIS PHASE I ESA

According to the Client, this Phase I ESA was conducted as part of environmental due diligence related to the reacquisition the subject property.

3.0 SUBJECT PROPERTY DESCRIPTION

3.1 LOCATION AND LEGAL DESCRIPTION

The subject property is located in the northwest ¼ of Section 15 in Mt. Pleasant (T.14 N, R.4 W), Isabella County, Michigan. The subject property is situated north of West Broadway Street. It consists of one irregularly shaped parcel that contains approximately 1.40 acres. The most recent owner of record on the assessment cards is Central Michigan Developers LLC; however, the current owner of the subject property is the City of Mt. Pleasant.

The following table presents additional information regarding the subject property.

<table>
<thead>
<tr>
<th>Address</th>
<th>Tax Identification Number</th>
<th>Current Owner</th>
<th>Approximate Acreage</th>
</tr>
</thead>
<tbody>
<tr>
<td>320 West Broadway Street</td>
<td>17-000-15827-00</td>
<td>City of Mt. Pleasant</td>
<td>1.40</td>
</tr>
</tbody>
</table>

Note that the subject property was formerly part of a parent parcel of land identified as 17-000-15826-00. According to the City of Mt. Pleasant, the property is zoned Central Business District (C-2).

Refer to Figure 1, Subject Property Location Map; Figure 2, Topographic Location Map; Figure 3, Parcel Map; and Figure 4, Subject Property Map. The legal description of the subject property parcel is provided in Appendix B. Photographs taken during AKT Peerless’ subject property reconnaissance are provided in Appendix C.

Based on the historical resources reviewed, the subject property has been identified by or associated with the following addresses over time:

- 320 West Broadway Street (in connection with the parent parcel)
- 320 ½ West Broadway Street
- 324 West Broadway Street
- 412 West Broadway Street
- 413 West Broadway Street

3.2 SUBJECT PROPERTY AND VICINITY CHARACTERISTICS

The subject property is zoned Central Business District (C-2) and is located in an area of Mt. Pleasant that is characterized by commercial properties, a park, surface roadways, a river, municipal water, sanitary and storm sewer services, electrical and gas utilities.
3.3 DESCRIPTION OF STRUCTURES AND OTHER IMPROVEMENTS

The subject property consists primarily of vacant grass-covered land and an asphalt-covered walkway with wooden railings and a bench located on the northernmost portion of the site. The southwest corner of the site is the location of a concrete pad with meters and access points to subsurface municipal utilities. The walkway, sidewalk and bench are associated with the City of Mt. Pleasant – Island Park, more specifically, the “Riverwalk Trail Extension.”

3.4 CURRENT USE OF THE SUBJECT PROPERTY

With the exception of the Riverwalk Trail and utilities described above, the subject property currently is unused.

3.5 UTILITIES AND MUNICIPAL SERVICES

AKT Peerless identified the type and supplier of utilities provided to the subject property. These services are described in the following table:

<table>
<thead>
<tr>
<th>Utility / Service</th>
<th>Type</th>
<th>Utility Company or Municipality</th>
<th>Comments/Historical Services</th>
</tr>
</thead>
<tbody>
<tr>
<td>Heat</td>
<td>Natural gas</td>
<td>DTE</td>
<td>Natural gas is provided to the area of the subject property. A connection date could not be identified.</td>
</tr>
<tr>
<td>Municipal waste</td>
<td>General refuse</td>
<td>Private</td>
<td>Solid waste is not currently generated at the subject property.</td>
</tr>
<tr>
<td>Potable water</td>
<td>Municipal</td>
<td>City of Mt. Pleasant</td>
<td>The date of municipal water connection to the area of the subject property was approximately 1910. The site is believed to have historically used on-site water wells.</td>
</tr>
<tr>
<td>Electricity</td>
<td>Electric lines</td>
<td>Consumers Energy</td>
<td>Electricity is believed to have been provided to the area of the subject property since development or at least the early 1900s.</td>
</tr>
<tr>
<td>Sewage disposal</td>
<td>Municipal</td>
<td>City of Mt. Pleasant</td>
<td>The municipal sewer system in the area of the subject property was installed in the 1950s.</td>
</tr>
<tr>
<td>Storm water</td>
<td>City/County</td>
<td>City of Mt. Pleasant/Isabella County</td>
<td>The date of storm sewer installation in the area of the subject property was not determined.</td>
</tr>
</tbody>
</table>

Additional information regarding the referenced heat, water, and sewage utilities is presented in Section 4.4.

3.6 CURRENT USES OF THE ADJOINING PROPERTIES

The following table describes the current uses of the adjoining properties, identified occupants, and noteworthy observations of environmental concern, if any, that were noted during AKT Peerless’ recent reconnaissance of the adjoining properties:

<table>
<thead>
<tr>
<th>Direction</th>
<th>Address</th>
<th>Current Use / Occupant</th>
<th>Potential Concerns</th>
</tr>
</thead>
<tbody>
<tr>
<td>North</td>
<td>None</td>
<td>Chippewa River</td>
<td>None observed</td>
</tr>
<tr>
<td></td>
<td>None</td>
<td>South Island Park</td>
<td></td>
</tr>
</tbody>
</table>
Based on AKT Peerless’ visual observations, the current uses of the adjoining properties do not appear to pose a direct environmental threat to the subject property.

4.0 RECORDS REVIEW

The objective of the records review is to evaluate reasonably ascertainable databases, historical records, and physical setting records to help identify RECs at the subject property and, to the extent identifiable, at surrounding properties.

4.1 PHYSICAL SETTING SOURCES

AKT Peerless reviewed geological survey maps for geologic, hydrologic, and topographic conditions that may affect potential contaminant migration to the subject property.

4.1.1 Topography and Area Hydrogeology

According to the USGS’ *Topographic Map of the Mount Pleasant Quadrangle*, which was published in 1973, the subject property is situated 750 and 770 feet above the National Geodetic Vertical Datum (NGVD). The subject property’s topography appears to decline moderately to the north towards the adjacent Chippewa River.

AKT Peerless did not obtain or review reports that document actual groundwater conditions at or adjacent to the subject property except as described in previous environmental investigations. Previous subsurface investigations, discussed in Section 4.4.5, encountered groundwater approximately 2 to 4 feet below ground surface (bgs).

Typically, the water table aquifer flows toward a major drainage feature or in the same direction as the drainage basin. The Chippewa River is located adjacent to the north of the subject property. Therefore, AKT Peerless infers that groundwater beneath the subject property flows to the north.

4.1.2 Area Geology and Soils

According to the Michigan Department of Natural Resources (MDNR) Geological Survey Division’s *Bedrock Geology of Southern Michigan* (1987), bedrock beneath the subject property which is included in the Pottsville Series within the Pennsylvanian System of the Paleozoic Era. The depth to bedrock beneath the subject property was not readily available prior to the completion of this Phase I ESA.
According to the Michigan Geological Survey Division’s publication, *Quaternary Geology of Southern Michigan*, soils in the area are lacustrine clay and silt. These soils are described as gray to dark reddish brown and are varved in some localities. The soil chiefly underlies extensive, flat, low-lying areas formerly inundated by glacial Great Lakes. Soil thickness ranges from 10 to 30 feet. Typically, lacustrine clay and silt are associated with low hydraulic permeability and restrict the movement of groundwater.

AKT Peerless did not obtain other information about the subject property’s soil during this Phase I ESA, except as described in previous environmental investigations. Previous subsurface investigations, discussed in Section 4.4.5, identified a mixture of sands, gravel, clays, and fill materials to a depth of 5 feet bgs. Shallow groundwater has been identified near surface to 2 feet bgs.

According to the USDA’s *Soil Survey of Saginaw County, Michigan* (1994), soil at the subject property is classified as belonging to the Lacustrine Sand and Gravel association, which is described as fine to medium sand, commonly including beds or lenses of small gravel. These soils occur chiefly as former beach and near-offshore littoral deposits of glacial Great Lakes and may include intercalated lacustrine clay. Soil thickness ranges from 3 to 100 feet. Typically, lacustrine sand and gravel are associated with moderate hydraulic permeability and may allow the movement of contaminants through groundwater.

### 4.2 STANDARD ENVIRONMENTAL RECORD SOURCES

AKT Peerless retained EDR to provide current environmental database information compiled by a variety of federal and state regulatory agencies. The purpose of obtaining this data was to evaluate potential environmental risks associated with the subject property, adjoining sites, and other sites that are: (1) identified on target lists, and (2) within varying distances of up to one mile from the subject property. AKT Peerless reviewed the following federal and state databases for such listings within the indicated search radii.

<table>
<thead>

* Neither the USEPA nor Michigan Tribal Governments nor the State of Michigan maintains registries of sites with Institutional Controls / Engineering Controls in the subject property area.

4.2.1 **Subject Property and Occupant Listings**

The EDR Report does not identify the subject property or its known occupants on the referenced databases, except for the following:

- The address of 320 W. Broadway was identified on the SHWS database (facility ID# 37000143) and in the BEA database. The SHWS database (facility ID# 37000143) indicates that the property is impacted with lead pollutants as a result of “Food & Kindred Products.” The SHWS database listing indicated that further activities are anticipated. The BEA database indicated that the address is the subject of a Category “N” BEA (#818), which was completed on behalf of the Economic Development Corporation of the City of Mt. Pleasant and received by the MDEQ Saginaw/Bay district office on April 16, 2007.

- Former Borden Property/Adjoining Parcel, at 320 W. Broadway, was listed on the BEA database. According to the EDR Report three Category “N” BEAs were received by the MDEQ Saginaw/Bay district office on December 15, 2000. The BEAs were completed on behalf of Mt. Pleasant Central Business District (BEA #359), Mt. Pleasant Economic Development Corp. (BEA #360) and Brownfield Development Corp. (BEA #361).

Additional information about the presence of the subject property on the referenced database(s) is presented in Sections 4.3 and 4.4.5.

4.2.2 **Adjoining and Nearby Sites**

AKT Peerless’ review of the referenced databases (including those on the orphan list) also considered the potential or likelihood of contamination from adjoining and nearby sites. To
evaluate which of the adjoining and nearby sites identified in the EDR Report present an environmental risk to the subject property, AKT Peerless considered the following criteria:

- The type of database on which the site is identified.
- The topographic position of the identified site relative to the subject property.
- The direction and distance of the identified site from the subject property.
- Local soil conditions in the subject property area.
- The known or inferred groundwater flow direction in the subject property area.
- The status of the respective regulatory agency-required investigation(s) of the identified site, if any.
- Surface and subsurface obstructions and diversions (e.g., buildings, roads, sewer systems, utility service lines, rivers, lakes, and ditches) located between the identified site and the subject property.

Only those sites that are judged to present a potential environmental risk to the subject property are further evaluated by reviewing MDEQ file information. Using the referenced criteria, and based upon a review of readily available information contained within the EDR Report, AKT Peerless did not identify adjoining (i.e., bordering) or nearby sites (e.g., properties within a ¼-mile radius) listed in the EDR Report that were judged to present a potential environmental risk to the subject property, except for the following:

<table>
<thead>
<tr>
<th>Database(s):</th>
<th>BEA, SHWS, Indian UST, UST</th>
<th>Distance:</th>
<th>Adjoining</th>
</tr>
</thead>
<tbody>
<tr>
<td>Name:</td>
<td>Former Honnegers Elevator Site; Honneger’s Grain Elevator; Honnegers &amp; Co Inc; and Jack Dormeier</td>
<td>Direction:</td>
<td>South</td>
</tr>
<tr>
<td>Address:</td>
<td>411 West Broadway St., SW Corner of W. Broadway Street and S. Oak Street</td>
<td>Elevation:</td>
<td>758 feet</td>
</tr>
<tr>
<td>Section References:</td>
<td>Refer to Section 4.3.2</td>
<td>Known/Inferred Groundwater Flow Direction:</td>
<td>Inferred North</td>
</tr>
</tbody>
</table>

The address of 411 West Broadway Street was identified on the BEA, SHWS, Indian UST and MDEQ UST databases. The BEA database includes facilities at which contaminant concentrations exceed MDEQ Generic Cleanup Criteria (GCC) and Screening Levels: Residential and Commercial I Criteria developed under the authority of Part 201 of the NREPA, 1994 P.A. 451, as amended. The BEA List database indicates that four Category “N” BEAs were completed for this property: (1) BEA #115 was completed on behalf of Jack Doremire and was received by the MDEQ Saginaw/Bay District office on November 24, 1997; (2) BEA #258 was completed on behalf of Brownfield Development Corporation and was received by the MDEQ Saginaw/Bay District office on November 2, 1999; (3) BEA #262 was completed on behalf of the City of Mt. Pleasant and was received by the MDEQ Saginaw/Bay District office on November 23, 1999; and (4) BEA #198 was completed on behalf of C & M Properties and was received by the MDEQ Saginaw/Bay District office on February 4, 1999. The SHWS listing (Facility ID #37000125) indicated that the site is impacted with Dibutylphthalate (DBP), lead and polychlorinated biphenyls (PCBs); the site status indicated that interim response is in progress. The Indian UST listing (Facility ID #00001217) indicated that a 3,000-gallon capacity UST was installed on March 4, 1971, and was closed on October 1, 1997. The UST listing (Facility ID #00001217) indicated that a 3,000-gallon capacity UST for the storage of diesel fuel was installed on March 4, 1971, and was removed from the ground on December 19, 1996. A release was not reported in connection with the UST.
AKT Peerless reviewed the EDR Report – Orphan List and discovered the following listings, which were determined to be connected with the above listed site:

- MI Dept/Natural Resources and En, 411 Broadway St, Mt. Pleasant, MI 48858
  - RCRA-NonGen database - beginning operations on February 13, 1998
    - A RCRA-NonGen no longer generates waste
    - No violations or releases were listed

- Honnigers Elevator, Corner of Broadway and Oak Street, Mt. Pleasant MI 48858
  - Facility Index System (FINDS)
    - Specific information not available within this database

<table>
<thead>
<tr>
<th>Database(s):</th>
<th>BEA, RCRA-CESQG</th>

<td>765 feet</td>
</tr>
<tr>
<td>Section References:</td>
<td>Refer to Section 4.3.2</td>
<td>Known/Inferred Groundwater Flow Direction:</td>
<td>Inferred North</td>
</tr>
</tbody>
</table>

The address of 109 Oak Street was identified on the BEA and RCRA-conditionally exempt small quantity generator (CESQG) databases. The BEA List database indicates that a Category “N” BEA (#224) was completed on behalf of Michigan Building, Inc. and was received by the MDEQ Saginaw/Bay District office on May 24, 1999. The RCRA-CESQG listing does not list any reported violations. A CESQG generates 100 kg or less of hazardous waste per calendar month and accumulates 1,000 kg or less of hazardous waste at any time.

AKT Peerless reviewed the EDR Report – Orphan List and discovered the following listings, which were determined to be located within close proximity to the subject property:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

This Orphan Site was identified on the BEA database. The BEA List database indicates that a Category “N” BEA (#894) was completed on behalf of Economic Development Corporation of the City of Mt. Pleasant and was received by the MDEQ Saginaw/Bay District office on May 21, 2008.
4.3 ENVIRONMENTAL RECORD SOURCES

4.3.1 MDEQ Resource Management Division (RMD) Records

AKT Peerless contacted the MDEQ RMD to review available records regarding waste management activities, permits, inspections and violations associated with the subject property. At the time of the completion of this report, AKT Peerless did not receive a response from the MDEQ RMD regarding the subject property. AKT Peerless also reviewed the MDEQ Waste Data System (WDS) database and did not discover any records regarding the subject property, parent parcel or adjacent properties.

4.3.2 MDEQ Remediation and Redevelopment Division (RRD) Records

Subject Property:

AKT Peerless reviewed the MDEQ-RRD Cost Recovery Unit’s Perfected Lien List, dated October 2, 2012, to determine if environmental cleanup liens had been filed against the subject property. According to information provided, the MDEQ does not have record of environmental cleanup liens filed against the subject property. AKT Peerless reviewed the MDEQ Storage Tank Information Database and did not discover any active or closed status records regarding the subject property.

AKT Peerless contacted the MDEQ-RRD Saginaw/Bay District Office to review available records regarding environmental information, registered USTs or LUSTs associated with the subject property and/or the parent parcel. The MDEQ-RRD responded to the information request and indicated that file information was discovered regarding the subject property’s parent parcel and nearby sites (individually discussed in Section 4.2.2). The following reports and/or information was reviewed and determined to be associated with the subject property portion of the parent parcel:

- Phase II ESA, prepared in May 1992, by TMI Environmental Services, on behalf of Mr. Frank Hutto
- Phase I ESA, prepared in March 1992, by TMI Environmental Services, on behalf of Mr. Frank Hutto
- Several other current and historical documents including, site plans, drawings, newspaper articles, correspondence, and site history summaries

The previous environmental reports are summarized in Section 4.4.5.

**Adjoining and/or Nearby Properties:**

AKT Peerless contacted the MDEQ-RRD Saginaw/Bay District Office to review available records regarding environmental information, registered USTs and LUSTs associated with the adjoining and/or nearby properties. The following information was obtained from reviews of the filed reports:

411 West Broadway St., SW Corner of W. Broadway Street and S. Oak Street
The BEAs indicated that the site formerly operated for flour milling and animal feed manufacturing. One diesel UST was removed from the site in 1997. Subsurface investigations identified several metals and semi-volatile compounds in soil at the site, above the generic residential cleanup criteria. Part 201, as amended, provides for the identification, risk assessment, evaluation and cleanup of sites of environmental contamination in the State. The SHWS site status is based on the contamination identified within the BEAs. Based on the known impact, close proximity, and inferred up-gradient location, the site represents an off-site REC to the subject property.

109 Oak Street
The BEA indicated that the site formerly operated as an automotive repair facility. File information indicated that the site was impacted with lead concentrations above (previous) residential GCC; however, the lead concentrations are below current residential GCC. The facility determination was based on a limited investigation of the site (one soil sample). Based on the known impact, close proximity, additional potential impacts not identified, and inferred up-gradient location; the site represents an off-site REC to the subject property.

West Broadway Street, 0.15 Acre Portion of Parcel 17-000-15824-00
The BEA indicated that the site was the historical location of a railroad line crossing and a mill race. Site observations noted the presence of coal and foundry slag materials at various locations across the site. File information indicated that the site’s soils are impacted with arsenic, chromium, selenium, naphthalene, 1,2,3-TMB and 1,2,4-TMB at concentrations exceeding residential GCC. The analytical data, sampling locations and site observation details are included on the attached Figure 4 (Subject Property Map) of this ESA. Based on the known impact and adjacent proximity, the site represents an off-site REC to the subject property.
West Broadway Street, Parcel 17-000-15823-00
The BEA indicated that the site was the historical location of a lumber yard and railroad tracks/spurs, site observations noted the presence of coal and foundry slag materials across the site. File information indicated that the site’s shallow (1.0’-1.5’) soils are impacted with arsenic, chromium and selenium at concentrations exceeding residential GCC. Based on the known impact and close proximity, the site represents an off-site REC to the subject property.

4.4 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

4.4.1 Local Health Department
The Central Michigan District Health Department indicated that they do not have records pertaining to 320 West Broadway Street, Mt. Pleasant, Michigan. According to personnel, the subject property area is serviced by a public water supply and storm water sewer. Personnel were not aware of any environmental concerns associated with the subject property.

4.4.2 Local Fire Department
A Freedom of Information Act (FOIA) request was submitted to the City of Mt. Pleasant Fire Department regarding potential environmental concerns at the subject property. The City of Mt. Pleasant Fire Department informed AKT Peerless that no files were discovered regarding the subject property. Personnel did not indicate any additionally significant information or personal knowledge regarding the subject property.

4.4.3 Water & Sewage Utility Provider
The City of Mt. Pleasant provides water and sewer services to the area of the subject property. The Mt. Pleasant Engineering Department indicated that water services were installed in the subject property area, along West Broadway in the early 1900s and sewer services have been available since the late 1910s/1920s. Mt. Pleasant Engineering Department personnel indicated that the parent property (former Borden Factory) had historically used on-site water wells and discharged water to the proximate Chippewa River.

4.4.4 Natural Gas Provider
DTE is the natural gas provider for the area of the subject property. No information regarding natural gas connection dates was available from DTE.

4.4.5 Previous Environmental Reports
AKT Peerless was not provided with copies of reports that document previous investigations or assessments of the subject property, nor did AKT Peerless identify the existence of such documents during this assessment except as follows (locations of the reports are indicated within parenthesis):

- **Phase I ESA**, prepared in March 1992, by TMI Environmental Services, on behalf of Mr. Frank Hutto (MDEQ file)
- **Phase II ESA**, prepared in May 1992, by TMI Environmental Services, on behalf of Mr. Frank Hutto (MDEQ file)

• BEA, prepared in November 2007, by AKT Peerless Environmental on behalf of the James E. Johnson; Riverplace on Broadway, LLC and Central Michigan Developers, LLC. (AKT Peerless file)

• Several other current and historical documents including, site plans, drawings, newspaper articles, correspondence, and site history summaries (AKT Peerless and MDEQ files)

**Phase I ESA, TMI Environmental, March 1992**
The Phase I ESA was completed on the Borden site (parent parcel) and included the subject property portion of the parent parcel. The following potential threats of environmental contamination to the subject property were identified:

• Potential impacts resulting from the historical location of the Ann Arbor Railroad tracks on the subject property.

• Potential contamination resulting from the historical coal storage on the subject property.

**Phase II ESA, TMI Environmental, May 1992**
The Phase II ESA was completed to investigate the potential environmental concerns identified within the March 1992 Phase I ESA. Seven soil borings were completed on the parent parcel. The borings were advanced to an average depth of 4 feet bgs. Soil samples were collected from six of the borings at a depth of approximately 4 feet bgs. Water samples were collected from each of the borings. The samples were analyzed for a variety of volatile and semi-volatile organic compounds (VOCs, SVOCs), pesticides, PCBs, and metal compounds. None of the sampling locations were determined to be located on the subject property portion of the parent parcel.

**BEA, AKT Peerless Environmental, November 2000**
The BEA was based on a Phase I ESA completed by AKT Peerless in September 2000 and Phase II Site Investigation completed by AKT Peerless in September 2000. Five soil samples and one water sample were collected from the parent parcel in August 2000 to assess RECs identified within the Phase I ESA. One soil sample (SB-5) was collected from the subject property portion of the parent parcel. The parent parcel BEA was completed based on the identification of arsenic, chromium, lead, mercury, and selenium in soil above the Michigan Residential GCC. The subject property portion of the parent parcel was evidenced with arsenic, chromium, and selenium in soil above the Michigan Residential GCC.

**BEA, AKT Peerless Environmental, November 2007**
The BEA was based on a Phase I ESA completed by AKT Peerless in August 2006, Phase II Site Investigation completed by AKT Peerless in August 2006 and a Geophysical Survey Report completed by Geophysical Imaging in August 2006. The BEA was completed for the subject property. On August 4, 2006, AKT Peerless conducted a subsurface investigation at the subject property and the parent parcel, to address select RECs identified in AKT Peerless’ 2006 Phase I
ESA. The scope of the Phase II Subsurface Investigation was determined in conjunction with the MDEQ via discussions and work plan revisions. AKT Peerless: (1) advanced one soil boring on the subject property, (2) collected one soil sample from the subject property; and (3) submitted the sample for laboratory analyses. AKT Peerless performed a qualitative evaluation of the soil sample collected during drilling and a quantitative analysis (laboratory analysis) of the discrete soil sample.

The sample was submitted for laboratory analyses of select parameters including VOCs, polynuclear aromatic hydrocarbons (PNAs), and “Michigan 10” metals.

An individual Phase II report was not prepared; and consequently, a summary of the Phase II Subsurface Investigation is incorporated into the 2007 BEA report.

The geophysical survey report, dated August 8, 2006, was completed for the subject property in connection with the parent parcel. The findings of the survey indicated that the subject property (Parcel B) was discovered to contain several magnetic anomalies, which were individually interpreted to represent possible buried metal debris, abandoned pipes, former building foundations with footers and former building foundations/pads. No anomalies consistent with USTs were discovered at the subject property according to the Geophysical Survey Report.

According to the BEA, site development activities required the removal of topsoil from the parent parcel associated with the redevelopment of the Historic Borden Building. The topsoil was staged on the southeastern portion of the subject property (refer to the attached 2007 aerial photograph). According to the developer, approximately 1,356 tons of topsoil was removed to the Waste Management landfill located in Harrison, Michigan. The remaining topsoil may be used as fill on select portions of the parent parcel or removed for landfill disposal. The subject property and the parent parcel formerly operated together and share similar environmental conditions and facility compounds, the relocation of fill material between the two parcels was approved by the MDEQ in the 2006 planning meetings. To further evaluate the presence of contaminants within the stockpiled topsoil, the MDEQ requested the collection and analysis of samples from the topsoil. On October 31, 2007, AKT Peerless obtained two, composite samples of the topsoil, that had been stockpiled on the subject property portion of the parent parcel. Two soil samples (S-1 and S-2) were submitted for laboratory analysis of VOCs and SVOCs. Laboratory analysis identified the presence of VOCs and SVOCs above the laboratory detection limit. Facility compounds of VOCs and SVOCs were also identified. This material was not scheduled to remain on the subject property (or parent parcel); however, as no verification sampling was conducted the potential exists for facility levels of the VOCs or SVOCs to remain on the subject property. Therefore, these analytical results had been incorporated into the BEA.

### 4.5 HISTORICAL USE INFORMATION

The objective of reviewing historical sources is to: (1) develop a history of previous uses or specific occupancies of the subject property, (2) identify those uses or specific occupancies that are likely to have led to potential environmental concerns at the subject property, and to the extent identifiable, at adjoining properties, and (3) identify obvious uses of the subject property from the present, back to the property’s obvious first developed use, or back to 1940, whichever is earlier.
# Historical Summary – Subject Property

The following table summarizes the general development and use of the subject property, as identified by AKT Peerless.

<table>

The subject property was vacant in 1884, with the exception of the Saginaw/Mt. Pleasant Railroad, which crossed the southern portion of the subject property at that time. The subject property is bordered to the north by the Chippewa River and to the west by a Mill Race (channel). Three lumber sheds and two railroad spurs are depicted on the southern portion of the subject property in 1890. In 1895, the subject property is developed with seven structures and the railroad tracks are located on the northern and central portion of the site; the structures were depicted as an ice house, lumber shed, food and produce, as well as lime storage. By 1900, the existing structures at the subject property were depicted as warehouse, ice house, hay storage, lumber shed, food and produce, as well as lime storage. In 1910, the subject property is the location of an additional railroad spur and is the location of two grain elevator companies with lumber and coal storage activities. In 1924, the subject property is depicted as the Isabella County Farmers Grain Company and the structures/improvements include a hay and straw warehouse, grain elevator, lumber sheds office, planning mill, coal shed, two scales and brick piles. By 1931, the Isabella County Farmers Grain Company included additional coal storage bins/structures and a grocery warehouse. In 1950, the subject property is depicted as the Mt. Pleasant Lumber Company; the uses of the property include a grocery warehouse, lumber sheds, cement and roofing warehouse, coal shed, coal yard, scales and lumber yard. By 1961, the subject property is depicted as a coal yard with two structures and associated railroad tracks/spurs. In 1965, the subject property is developed with a 300-ton capacity (12,500 bushels) feed hopper; the northeastern portion of the subject property is the location of a structure (grocery warehouse) and the southwestern portion is the location of a structure (lumber/coal warehouse). Aside from the hopper, railroad tracks/spurs and two buildings, the subject property does not maintain any of the historical structural developments. At some point between 1966 and 1972, the western adjacent waterway (mill race) appears to have been filled in. By 2007, the subject property buildings and railroad tracks/spurs were razed. In December 2012, the subject property appeared to be level land without any structures; an asphalt-covered walkway, bench and wooden railings are present on the northern portion of the lot adjacent to the Chippewa River.
Historical Summary – Adjoining Properties

North
The adjoining property to the north beyond the Chippewa River was unimproved wooded land until development as a park by at least the 1930s. The northern adjoining property remains developed as a park.

East
The adjoining property to the east was unimproved vacant land with the exception of the Saginaw and Mt. Pleasant Railroad track in 1884 and 1890. By 1895-1890, it was developed with a freight house and railroad spur. By 1990, the site was structurally developed with an industrial building and warehouse that operated as the Michigan Condensed Milk Company. From ≈1924 through ≈1953, the eastern adjacent property was operated under the Borden Company as dairy processing plant. By 1960-61, the site was vacant and reportedly remained vacant until redevelopment activities began in ≈2007. By 2012, the site was completely remodeled and occupied by Mt. Pleasant City Hall (municipal offices).

South
The adjoining property to the south beyond West Broadway Street consisted of a railroad spur, Mt. Pleasant Roller Mills (grain refining) and a copper shop in 1884. By 1890, the copper shop was not present and the site consisted of numerous structures associated with grain refining (gleaning, grinding, bolting and dust control). It should be noted that the grain refinement operations were powered by water that passed through the mill race, which also traversed the western portion of the subject property at that time. From 1895 through ≈1984, the Mt. Pleasant Roller Mills and Harris Milling Company operations continued. By 1992, the majority of the structures on the southern adjoining property appeared to be razed. By 2007, the site was redeveloped with a commercial structure and associated asphalt-covered parking areas. In December 2012, the site was observed as the location of Broadway Health Services.

West
The adjoining property to the west, beyond the mill race, appeared to consist of undeveloped land in 1884. By 1890, it was the location of the city water well and a refuse burning pit, which appeared to collect waste materials (i.e. wood) via a conveyor from the southern adjoining hoop factory. By 1895, the site was developed with an additional water well, railroad spurs, a locomotive house (greasing and maintenance activities) and a railroad turn-style. By 1900, a railroad passenger station was developed and the refuse burning pit is no longer depicted. By 1910, the City Water Works constructed a building adjacent to the two water wells; the operations were powered by water flow through the mill race and a 12-inch diameter water line is depicted beneath Broadway Street. From 1931 through 1961, coal storage, ice storage and freight warehousing operations are depicted on the site, as well as the City Water Works and their associated wells. December 2012, the former City Water Works building was occupied by Water Works Salon & Spa and the former railroad passenger station/freight warehouse was occupied by Mountain Town Station (brewery and steakhouse); the remaining portions of the west adjoining property consist of asphalt-covered parking/drive areas.
## 4.5.1 Aerial Photographs

AKT Peerless obtained aerial photographs for the subject property from EDR. AKT Peerless’ observations noted during the review of these photographs are summarized in the following table. Photocopies of select aerial photographs are presented as Appendix E.

<table>
<thead>
<tr>
<th>Photo Dates</th>
<th>Observations (Subject Property)</th>
<th>Potential Environmental Concerns</th>

<tr>
<td>1950, 1957, 1958</td>
<td>The subject property is shown as developed for commercial/industrial use. An outbuilding or shed is shown on the northeastern portion of the property adjacent to the Chippewa River. At least four structures are present on the western portion of the subject property. A railroad traverses the northern portion of the subject property in an east/west direction. Railroad spurs are also shown on the subject property. A waterway (mill race) is present along the west edge of the subject property.</td>
<td>Suspect industrial activity, railroad, and rail spurs</td>
</tr>
<tr>
<td>1965, 1966, 1972, 1982, 1984</td>
<td>These aerial photographs appear similar to the previous aerial photographs from the 1950s, with the following changes: A relatively tall structure (grain hopper) is present on the central eastern portion of the site. Some of the former buildings have been removed. At some point between 1966 and 1972, the western adjacent waterway (mill race) appears to have been filled in.</td>
<td>Suspect industrial activity, railroad, and rail spurs</td>
</tr>
<tr>
<td>1992</td>
<td>This aerial photograph appears similar to the 1984 aerial photograph, with the following changes: the subject property is shown as developed with the former grain hopper and none of the previously noted structures appear to be present.</td>
<td>None observed</td>
</tr>
<tr>
<td>2007</td>
<td>This aerial photograph depicts the subject property without any structural improvements or railroad tracks/spurs. The site appears to have been recently leveled with grading equipment. A soil pile is present on the central eastern portion of the site. The southwest corner of the site is the location of meters and access points to subsurface municipal utilities. This aerial photograph appears similar to what was observed at the time of the site reconnaissance for this Phase I ESA.</td>
<td>The existence of fill material from an unknown source</td>
</tr>
</tbody>
</table>

AKT Peerless’ review of historical aerial photographs of the adjoining properties is summarized in the following table.

<table>
<thead>
<tr>
<th>Photo Dates</th>
<th>Potential Environmental Concerns (Adjoining Properties)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1952, 1958, 1965, 1972, 1982, 1992</td>
<td>No obvious evidence or indications of RECs or other potential environmental concerns were noted with respect to the adjoining properties during AKT Peerless’ review of the referenced aerial photographs, aside from the fact that the adjoining properties appear to have been developed with industrial/manufacturing buildings to the west, south and east beginning in the 1950s.</td>
</tr>
</tbody>
</table>
4.5.2 Fire Insurance Maps

AKT Peerless obtained fire insurance maps for the subject property from EDR, the City of Mt. Pleasant. AKT Peerless’ observations noted during the review of these maps are summarized in the following table. Photocopies of the referenced maps are presented in Appendix F.

<table>
<thead>
<tr>
<th>Map Dates</th>
<th>Observations (Subject Property)</th>
<th>Potential Environmental Concerns</th>
</tr>
</thead>
<tbody>
<tr>
<td>1884</td>
<td>The subject property is labeled vacant. The Saginaw and Mt. Pleasant Railroad is shown crossing the southern portion of the subject property.</td>
<td>Railroad tracks</td>
</tr>
<tr>
<td>1890</td>
<td>A lumber shed and two lumber piles are depicted on the southeastern portion of the subject property proximate to the railroad. A rail spur is shown on the eastern portion of the property.</td>
<td>Railroad track and spur</td>
</tr>
<tr>
<td>1895</td>
<td>The railroad was relocated to the northern portion of the property. A rail spur is shown crossing the western and central portions of the property. Six structures are shown on the eastern portion of the property. Two of the structures are not labeled. The remaining structures are labeled as lumber shed, icehouse, lumber, feed and produce, and lime.</td>
<td>Railroad and rail spurs Lime storage</td>
</tr>
<tr>
<td>1900</td>
<td>The western portion of the subject property remains generally consistent with the 1895 Sanborn Map, with the exception of two additional structures labeled as warehouse and hay.</td>
<td>Railroad tracks and spurs Lime storage</td>
</tr>
<tr>
<td>1910</td>
<td>The northern portion of the subject property is not shown on the 1910 Sanborn map. An office and two grain elevator companies are shown on the subject property. The eastern company is labeled Sweeney &amp; Co. Elevator. The western company is labeled Independent Elevator, Co. Structures on the western portion of the property are labeled as hay, straw, and coal warehouses/sheds.</td>
<td>Railroad tracks and spurs Coal storage</td>
</tr>
<tr>
<td>1924</td>
<td>With the exception of the addition of two scales and a planing mill on the subject property, structural development remains generally consistent with what was described from the 1910 Sanborn Map. The subject property is labeled as the Isabella County Farmers Grain, Co. and Mt. Pleasant Lumber, Co.</td>
<td>Railroad tracks and spurs Coal storage</td>
</tr>
<tr>
<td>1931</td>
<td>With the exception of the addition of a grocery warehouse, cement and roofing warehouse and several areas of coal storage (sheds, bins &amp; piles) on the subject property, it appears consistent with the 1924 Sanborn Map. The subject property is labeled as the Isabella County Farmers Grain, Co. and Mt. Pleasant Lumber, Co.</td>
<td>Railroad tracks and spurs Exterior coal storage</td>
</tr>
<tr>
<td>1950</td>
<td>The subject property is labeled coal yard, lumber yard and Mt. Pleasant Lumber, Co.</td>
<td>Railroad tracks and spurs Exterior coal storage</td>
</tr>
<tr>
<td>1961</td>
<td>The subject property is labeled coal yard and lumber yard. One building, labeled lumber and vacant, exits on the western edge of the site and a grocery warehouse is present on the northern portion of the site. Aside from these two buildings and railroad tracks and spurs, none of the former structures are depicted.</td>
<td>Railroad tracks and spurs Exterior coal storage</td>
</tr>
</tbody>

### 4.5.3 City Directories

City Directories from various years between 1926 and 1998 were reviewed at the Mt. Pleasant Public Library. The purpose of this review was to determine the past occupancy of the subject property. Information obtained from the reviewed directories is summarized in the following table. The addresses in the following table are located on West Broadway Street. The Sanborn fire insurance maps were used to determine the former addresses for the subject property.

<table>
<thead>
<tr>
<th>Dates</th>
<th>Subject Property Occupants, West Broadway Street</th>

</table>

An address that is not listed typically indicates that: (1) the property was vacant at that time, (2) a potential building was unoccupied at that time, (3) a previously existing address was different than the current address, (4) the building was not represented in the directory because of a “lag time” between building the structure and compiling the list, or (5) occupant information was not available for inclusion into the directory.

AKT Peerless did not review city directories for adjoining properties to determine their past occupancy.

4.5.4 Assessing Department Records

AKT Peerless reviewed tax assessment records on the subject property at the City of Mt. Pleasant Assessing Department. The following table summarizes features or items of potential environmental concern, if any, that were noted during the record review.

<table>
<thead>
<tr>
<th>Environmental Issue</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Storage Tanks</td>
<td>None identified</td>
</tr>
<tr>
<td>Asbestos-Containing Materials (ACMs)</td>
<td>None identified</td>
</tr>
<tr>
<td>PCB Materials</td>
<td>None identified</td>
</tr>
<tr>
<td>On-site Well/Septic System</td>
<td>None identified</td>
</tr>
<tr>
<td>Disposal Facilities/Fill Material (e.g., lagoons, pits, landfills, etc.)</td>
<td>None identified</td>
</tr>
</tbody>
</table>

No additional information that could indicate potential environmental concerns at the subject property was found in the records. The records indicated that the property was formerly owned/operated by the Ann Arbor Railroad Company, the Michigan Condensed Milk, Co., the Borden Company, and the Bader Milling Company. Copies of information obtained from the Mt. Pleasant Assessing Department are included in Appendix F.

4.5.5 Building Department Records

AKT Peerless attempted to review building records for the subject property at the City of Mt. Pleasant Building Department. According to the City of Mt. Pleasant Building Department, no building records were discovered regarding the subject property.

5.0 INTERVIEWS

AKT Peerless provided questionnaires to the subject property owner and key site manager, and as available, conducted interviews.
5.1 INTERVIEW WITH SUBJECT PROPERTY OWNER

AKT Peerless interviewed Mr. William Mrdeza, the City of Mt. Pleasant Community Services and Economic Development Director regarding his and the City’s knowledge of the subject property. Mr. Mrdeza indicated that the subject property has remained vacant land with no on-site operations, which is generally consistent with site use at the time of the previous environmental investigation conducted at the property. Mr. Mrdeza was not aware of significant changes to the subject property or adjoining sites since the time of the previous environmental investigations. With the exception of the known contamination and RECs reported in the previous environmental investigations, no information was reported that would be considered material to identifying RECs in connection with the subject property.

5.2 INTERVIEW WITH KEY SITE MANAGER

Refer to Section 5.1 for an interview with the Key Site Manager.

5.3 INTERVIEW WITH SUBJECT PROPERTY OCCUPANT(S)

The subject property is unoccupied; therefore, occupant interviews were not completed during the course of this ESA.

5.4 INTERVIEW(S) WITH OTHERS

AKT Peerless contacted the Central Michigan District Health regarding the subject property. According to personnel, the subject property is serviced by a public water supply and storm water sewer. Personnel were not aware of any health problems (indoor air quality issues, incidences of cancer, lead contamination or radon) associated with the subject property.

AKT Peerless contacted the City of Mt. Pleasant Fire Department regarding the subject property. According to personnel, there are not any departmental files regarding the subject property portion of the parent parcel. Personnel did not indicate any additionally significant information or personal knowledge regarding the subject property.

AKT Peerless interviewed Mr. Jason Moore of the City of Mt. Pleasant Engineering Department regarding the subject property. Mr. Moore stated that municipal water utilities have been available to the subject property since the early 1900s. Sanitary sewer utilities have been available since the late 1910s/1920s. Mr. Moore was not aware of any specific connectivity dates regarding the subject property. Mr. Moore provided AKT Peerless with copies of historical aerial photographs of the subject property area. The aerial photographs include property boundaries and the location of underground municipal utilities.

AKT Peerless interviewed a representative of the City of Mt. Pleasant Building Department regarding the subject property. Staff personnel indicated that the subject property is zoned Central Business District (C-2) and that the building department database does not contain any records regarding the subject property.

AKT Peerless interviewed Mr. Mike Lyons, of the MDEQ RRD regarding the subject property. Mr. Lyons is the MDEQ Project Manager assigned to the parent parcel of the subject property.
Mr. Lyons provided access to previous environmental reports for the subject property, submitted to the MDEQ, described in Section 4.4.5. Mr. Lyons was not aware of environmental conditions at the subject property beyond those described within the previous environmental assessments.

AKT Peerless personnel provided environmental consulting and engineering support during the time of the Riverwalk Trail installation on the subject property in June 2011. Mr. Ryan Londrigan of AKT Peerless reported observing slag and coal on the subject property during the 2011 Riverwalk Trail installation. The observed slag and coal remains on the subject property beneath the existing surface covers (sand, asphalt, and topsoil).

6.0 SUBJECT PROPERTY RECONNAISSANCE

6.1 METHODOLOGY AND LIMITING CONDITIONS

The subject property reconnaissance consisted of visual and physical observations of the subject property. AKT Peerless visually and/or physically observed the periphery of the subject property. In addition, AKT Peerless observed the subject property from all adjacent public thoroughfares. AKT Peerless viewed the subject property following a grid pattern designed to cover representative portions of the unimproved areas.

Mr. Dennis Kendall of AKT Peerless conducted the subject property reconnaissance on December 14, 2012. Mr. Kendall was unaccompanied during the site reconnaissance. AKT Peerless encountered the following project specific facts or conditions that limited our ability to access the subject property:

- Visual observations of the subject property were limited by the presence of snow cover.

6.2 GENERAL SUBJECT PROPERTY SETTING AND OPERATIONS

The subject property consists primarily of a grass-cover with a relatively small concrete pad for municipal utilities located on the southeast corner of the lot and an asphalt-covered walkway with wooden railings and a bench located on the northernmost portion of the site. The southwest corner of the site is the location of meters and access points to subsurface municipal utilities. The walkway, sidewalk and bench are associated with the City of Mt. Pleasant – Island Park, more specifically, the “Riverwalk Trail Extension.” In general, the subject property and surrounding areas appeared to be level without any significant topographical shift. AKT Peerless did not observe any operations at the subject property.

6.3 OBSERVATIONS

6.3.1 Hazardous Substances and Petroleum Products

AKT Peerless did not observe hazardous substances or petroleum products at the subject property.

6.3.2 Hazardous and Non-Hazardous Waste

AKT Peerless did not observe hazardous or non-hazardous waste at the subject property.
6.3.3 **Storage Tanks**
AKT Peerless did not observe evidence of former or existing UST systems (e.g., vent pipes, fill ports, dispensing pumps, patched pavement, etc.) at the subject property. AKT Peerless did not observe evidence of AST at the subject property.

6.3.4 **Unidentified Substances/Containers**
AKT Peerless did not observe evidence of unidentified substances or other suspect containers on the subject property.

6.3.5 **Potential PCB Containing Equipment**
AKT Peerless inspected the subject property for the presence of liquid-cooled electrical units such as transformers and large capacitors. Such units are notable since they may be potential sources of PCBs. AKT Peerless did not observe suspect PCB-containing equipment at the subject property.

6.3.6 **Interior Staining / Corrosion**
AKT Peerless did not observe evidence of interior staining or corrosion.

6.3.7 **Drains and Sumps**
AKT Peerless did not observe drains or sumps at the subject property.

6.3.8 **Discharge Features**
Storm water that falls upon the subject property appears to percolate directly into the ground or sheet-flow to the northern adjacent Chippewa River or the adjacent river cut/former mill race. AKT Peerless did not observe storm water catch basins or drains on the subject property. AKT Peerless observed several storm water catch basins located within the road right-of-ways; the catch basins connect to the municipal storm/sewer system.

6.3.9 **Pits, Ponds, and Lagoons**
AKT Peerless did not observe pits, ponds, or lagoons, or evidence thereof, at the subject property.

6.3.10 **Solid Waste Dumping / Landfills**
AKT Peerless did not observe evidence of solid waste dumping or landfills at the subject property.

6.3.11 **Stained Soil, Stressed Vegetation, Stressed/Stained Pavement**
AKT Peerless did not observe any evidence of stained soil, stressed vegetation, stressed pavement, or stained pavement at the subject property. However, the subject property was covered by approximately ½ inch of snow cover at the time of the site reconnaissance. This snow cover may have prevented observations of stained soil or stressed vegetation.
6.3.12 **Well and Septic Systems**
AKT Peerless did not observe physical evidence or indication of wells or septic systems at the subject property.

6.3.13 **Other Observations**
AKT Peerless did not note any other environmentally significant observations of the subject property.

6.4 **NON-ASTM SCOPE CONSIDERATIONS**
AKT Peerless did not evaluate any other potential environmental conditions (i.e., further areas of possible business/environmental concern and/or liability) that are outside the scope of ASTM Standard Practice E 1527-05. Examples of such potential environmental conditions that were beyond the scope of this Phase I ESA include: ACMs, cultural and historic resources, ecological resources, endangered species, health and safety, high-voltage power lines, indoor air quality, industrial hygiene, lead-based paints (LBP), lead in drinking water, moisture intrusion/suspect mold growth, noise pollution, radon, regulatory compliance/non-compliance and/or wetlands.

AKT Peerless advises users of this document who wish to obtain an evaluation of the subject property relative to any of the aforementioned non-ASTM issues to engage the services of a qualified environmental professional.

7.0 **CONCLUSIONS AND RECOMMENDATIONS**

7.1 **RECOGNIZED ENVIRONMENTAL CONDITIONS**

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527 of Parcel “B” located at 320 West Broadway Street in the City of Mt. Pleasant, Isabella County, Michigan (subject property). Any exceptions to, or deletions from, this practice are described in Section 8.0 of this report.

This assessment has revealed no evidence of RECs in connection with the property, except for the following:

1. As stated throughout this report, the subject property formerly operated for industrial and manufacturing purposes in connection with the parent parcel, including a dairy processing plant, grain elevators, lumber storage, and planing mill from approximately 1900 until the late 1970s. Potential environmental concerns typically associated with the historical utilization of the subject property for industrial and/or manufacturing purposes include: (1) the historical use and/or storage of bulk quantities of petroleum products and/or hazardous substances; (2) the potential of a historical release of these chemicals to the subsurface of the subject property; and (3) the potential historical generation of metal waste which could have been introduced to the subsurface of the subject property.

2. As described throughout this report, several railroad tracks and spurs historically crossed the subject property from at least 1884 through ≈1992. The former railroad tracks and spurs
indicate the potential for a past release of hazardous substances and/or petroleum products to the subject property; and consequently, are considered a REC.

3. As described in Sections 4.5 and 4.5.2 of this report, lime was historically stored and distributed from the subject property. The former storage medium and general housekeeping practices are unknown. Commercial lime storage and sales operations indicate the potential for a past release of hazardous substances to the subject property; and consequently, are considered a REC.

4. On July 5, 2006, and in June 2011, AKT Peerless observed foundry slag and coal on the subject property. Foundry slag and coal are known to contain hazardous substances and/or petroleum products. As described throughout this report, several coal storage yards were historically located on the subject property from at least 1910 through ≈1961. According to the historical information, the coal was either stored in sheds or outside, in bins or on the ground where it can be exposed to precipitation. Since that time, the majority of the subject property has been covered with sand, topsoil and the Riverwalk Trail. The historically observed foundry slag and coal is a REC.

5. As described throughout this report several historical structures and outbuildings were located on the property since the late 1800s. It is AKT Peerless’ opinion that the basement/foundation excavations left after demolition of the buildings previously located on the subject property were potentially filled with impacted material. The potential use of impacted fill material on the subject property is a REC.

6. As described in Section 4.4.5, BEAs and several Phase II ESAs were previously completed on the subject property and the former parent parcel. The former parent parcel is classified as a SHWS. According to the 2000 and 2007 BEA reports, two soil samples (B-1 and SB-5), located on the subject property, were determined to be impacted with arsenic, chromium, and selenium with concentrations exceeding the current MDEQ GCC and Screening Levels. In addition, two soil samples (S-1 and S-2) from a soil stockpile were identified with facility compounds of VOCs and SVOCs. The known impact on the subject property and former parent parcel with contaminant concentrations above MDEQ GCC and Screening Levels is a REC.

7. As described in Section 4.2.2 and 4.3.2, four (4) BEAs were conducted at the southern adjacent property identified as 411 West Broadway Street and 109 Oak Street. The BEAs indicate that the sites are impacted with several metals and SVOCs in the soil above the residential GCC. The SHWS site status for one of the adjoining properties (411 West Broadway Street) indicated that interim response is in progress with respect to the known impact of dibutylphthalate (DBP), lead and PCBs. Based on known impact described within the former BEAs and SHWS listing, close proximity, and inferred up-gradient location, the southern BEA sites represent an off-site REC.

8. A mill race was located along the western property boundary since at least the late 1800s. The mill race was filled at an unknown time between 1966 and 1972. Material used to fill the former mill race was not identified during the course of this assessment. The potential exists that the mill race was potentially filled with impacted material, which is considered a
REC. Additionally, a BEA indicated that the site (0.15 Acre Portion of Parcel 17-000-15824-00) was the historical location of a railroad line crossing and a mill race, site observations noted the presence of coal and foundry slag materials at various locations across the site. File information indicated that the site’s soils are impacted with arsenic, chromium, selenium, naphthalene, 1,2,3-TMB, 1,2,4-TMB and xylene at concentrations exceeding residential GCC. Based on the known impact and adjacent proximity, the site represents an off-site REC to the subject property.

9. As described in Section 4.2.2 and 4.3.2, a BEA for the nearby property (Parcel 17-000-15823-00), located 100-foot northwest of the subject property, indicated that the site was the historical location of a lumber yard and railroad tracks/spurs, site observations noted the presence of coal and foundry slag materials across the site. File information indicated that the site’s shallow (1.0’-1.5’) soils are impacted with arsenic, chromium and selenium at concentrations exceeding residential GCC. Based on the known impact and close proximity, the site represents an off-site REC to the subject property.

10. As discussed in Section 4.5.2, review of Sanborn Fire Insurance Maps revealed the following off-site RECs:

<table>
<thead>
<tr>
<th>Map Dates</th>
<th>Potential Environmental Concerns (Adjoining Properties)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1884</td>
<td>South adjoining: Copper Shop, industrial activities</td>
</tr>
<tr>
<td>1895</td>
<td>West adjoining: Locomotive turntable/ house, industrial greasing and maintenance activities</td>
</tr>
<tr>
<td>1900</td>
<td></td>
</tr>
<tr>
<td>1910</td>
<td>East Adjoining: Condensed Milk Company, industrial activities</td>
</tr>
<tr>
<td>1924</td>
<td></td>
</tr>
<tr>
<td>1931</td>
<td>East Adjoining: Condensed Milk Company, industrial activities</td>
</tr>
<tr>
<td>1950</td>
<td>West adjoining: Coal storage</td>
</tr>
</tbody>
</table>

Since RECs were identified during the performance of the Phase I ESA, further investigation and/or assessment is warranted in order to determine the nature, extent, magnitude, and materiality of the RECs associated with the subject property.

Based on the facility status of the subject property, AKT Peerless recommends a BEA be completed on behalf of any subsequent owner/operators of the subject property. AKT Peerless also recommends any future owner/operator of the subject property exercise “due care” as stated in Section 7a(1) of Part 201.

7.2 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS
AKT Peerless did not identify HRECs in connection with the subject property.

7.3 AREAS OF POTENTIAL CONCERN AND SIGNIFICANT DATA GAPS
AKT Peerless did not identify other areas of potential concern in connection with the subject property. Nevertheless, it is AKT Peerless’ opinion that a potential exists for an abandoned water well, septic system, and/or heating oil container to be present at the subject property.
Consequently, AKT Peerless recommends that such items, if identified or encountered during future development activities, be decommissioned, removed, and/or disposed in accordance with applicable federal, state, and local regulations. Additional action beyond that recommended above may be warranted if evidence of actual or historical heating oil USTs is identified at the subject property in the future.

However, as noted in Section 4.4.5 of this report, a geophysical survey report, dated August 8, 2006, was completed for the subject property in connection with the parent parcel. The findings of the survey indicated that the subject property portion of the parent parcel was discovered with several magnetic anomalies, which were interpreted to represent possible buried metal debris, abandoned pipes, former building foundations with footers and former building foundations/pads. USTs were not identified on the subject property portion (Parcel B) of the Geophysical Survey Report.

AKT Peerless did not identify or encounter any instances of significant data gaps during the course of this ESA.

8.0 DEVIATIONS

AKT Peerless did not deviate from ASTM Standard Practice E 1527-05 when performing this Phase I ESA (i.e., no components of that practice were deleted, and no additions to it were made.
9.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of our professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of this part. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

AREA OF EXPERTISE

Mr. Londrigan has been conducting and managing environmental investigations since January 1999. His knowledge and experience spans multiple environmental disciplines. Mr. Londrigan’s expertise includes evaluating environmental risk; assisting clients with environmental compliance, health, and safety; identifying, delineating, and removing a variety environmental contamination; compliance with Federal, State, and local environmental regulations; and assisting in transfer and reuse of environmentally impacted properties in a manner that protects public health and safety. Mr. Londrigan provides on-going environmental, health, and safety consulting support to various industrial and manufacturing facilities in Michigan. Mr. Londrigan has conducted and managed over 1,000 environmental investigations throughout the Midwestern United States.

- Environmental, Health, and Safety compliance and auditing
- Baseline Environmental Assessments (BEAs)
- Phase I and II Environmental Site Assessments (ESAs)
- Brownfields redevelopment and financing
- Grant management and reporting
- Chemical management and disposal
- Underground storage tank (UST) removal and closure
- Asbestos and hazardous materials assessments
- Lead-based paint assessments
- Mold surveys
AREA OF EXPERTISE (continued)

- Wetland assessments and permitting
- Air quality assessments
- Bid specifications and contractor oversight
- Environmental remediation
- Storm water management

SUMMARY OF SELECTED PROJECTS

(1) Managed a redevelopment project for Gratiot County, the City of Alma, and a private developer at a 400,000 square foot industrial facility in Alma, Michigan, within an expedited schedule of 90 days. The project was the sole 2008 award winner from the United States Environmental Protection Agency (EPA) for “a significant contribution to the Region 5 Brownfields Program.” Mr. Londrigan managed: 1) the environmental due diligence, 2) site investigation scope development, 3) subsurface investigation, 4) environmental reporting, 5) mediation between purchaser, regulatory agencies, and legal, 6) preparation of bid specifications and bidding, and 7) contractor coordination and oversight. The project included federal closure of four RCRA Solid Waste Management Units. A Category “S” BEA and Due Care Plan were completed and affirmed by the MDNRE. An 85,000 square foot basement and over 20 press pits and vaults were characterized and remediated or closed. Over 40,000-gallons of hazardous and non-hazardous liquid waste was removed. Over 300 yards of highly impacted soils were removed from beneath the factory floor. Twenty-five tons of scrap metal and obsolete equipment was cleaned and recycled.

(2) Managed a multi-phased project between 2007 and 2009 involving the redevelopment of the Former Osceola Refinery, in West Branch, Michigan. The project involved partnering between the MDNRE, West Branch Township, and a private developer. With both public and private funding, Mr. Londrigan managed all activities necessary to: 1) provide liability protection to the proposed purchaser, 2) provide documentation and planning necessary to protect environmental health and safety, and 3) oversaw and coordinated site construction. Despite significant challenges, project completed on time and under budget. Mr. Londrigan’s roles included: 1) oversight of environmental investigation, planning, and reporting, 2) coordination of site planning and design to overcome development limitations due to environmental impacts/conditions and provide a spatial separation from the existing contamination, 3) preparation of construction specifications and bidding, 4) contractor coordination and oversight, 5) environmental field investigations, 6) documentation of on-site activities and reporting to regulatory agencies, 7) review of contractor invoices, and 8) management and tracking of over 1 million dollar budget from multiple funding sources. Cost savings were implemented by incorporating historical investigations conducted on the property into the current investigation, which limited the extent of additional soil and groundwater sampling.

(3) Completion of high profile environmental due diligence projects at former automotive manufacturing properties in Michigan including Buick City, Flint; Chevy in the Hole, Flint; and Ford, Ypsilanti.

(5) Provided field oversight and reporting for a release of approximately 100 gallons of diesel fuel resulting from a vehicle accident on Interstate-96, near Novi, Michigan. Mr. Londrigan’s activities included: determining the extent of the release area, delineating regulated wetlands within the impacted area, wetland permitting, overseeing the excavation of approximately 1,000 yards of soil, collecting soil and groundwater verification samples, and submitting a closure report to the MDNRE.

(6) Conducted various multi-site storm water projects for municipal and industrial clients. Projects included all aspects of storm water assessment including preparation of simultaneous storm water pollution prevention plans, no coverage determinations, site visits, and routine inspections. Worked with clients to develop best management practices for significant materials with storm water exposure.

(7) Completed a Leaking Underground Storage Tank (LUST) closure for the release of gasoline and diesel fuel compounds at the General Motors Technical Center located in Warren, Michigan. The on-site impact was delineated via soil borings and the installation of monitoring wells. Project activities also included oversight of field technicians and coordination/reporting to General Motors and the MDNRE. Unrestricted closure was granted by the MDNRE.

(8) Conducted a multi-phased project for the purpose of bank foreclosure at an industrial facility in Flint, Michigan including a Phase I/II ESA and chemical disposal. Phase II activities included the delineation of on-site volatile and heavy metal impact. Disposal activities included: a chemical survey to identify the contents of up to 5,000 abandoned containers, segregation, waste characterization, profiling, bulking and lab packing, disposal coordination, and reporting to the MDNRE.

(9) Performed site assessment activities at a manufacturing facility in Rochester, Michigan and identified two separate releases consisting of petroleum compounds and heavy metals. Conducted soil remediation to remove direct contact and volatilization exposures. Installed 12 monitoring wells and tested quarterly to assess groundwater impact. Conducted a mixing zone determination on the adjacent stream where impact was venting. Drafted deed restrictions and submitted a Remedial Action Plan to the MDNRE.

(10) Performed an indoor air quality survey with a concentration on mold and asbestos at a four-story college campus building in southern Michigan. The inspection identified visual sources of water intrusion and mold amplification. Tape lifts and air sampling were conducted to identify areas of mold amplification. For abatement purposes, asbestos sampling was completed on impacted building materials.

(11) Conducted environmental compliance audits of waste vendors for a major automotive manufacturing company in Indiana, Ohio, and Canada on scrap steel and drum recycling facilities. The audits reviewed the compliance status of major applicable environmental regulations through the completion of an on-site visit, interviews, research into permits and plans, and compilation of a detailed summary report.
TRAINING/CERTIFICATIONS

OSHA 29 CFR 190.120 40 Hour Hazardous Waste Operations Training

Certified Hazardous Materials Manager (CHMM)

Certified Asbestos Building Inspector – Michigan

Certified Lead Inspector – Michigan

Dow Chemical Site Safety Representative – 40 hour

Michigan Certified Storm Water Operator – Industrial and Construction Sites

Thermo Fisher Scientific – Radiation Safety and Niton XRF Analyzers

Various Environmental Assessment and Compliance Training/Workshops

Energy Auditor Training – 24 hours classroom, 8 hours field - Principals of Energy Consumption, ASHRAE Utility Bill Analysis, and Lighting

Due Diligence University – Environmental Due Diligence (Volunteer Developer)

APPENDIX A

GENERAL LIMITATIONS AND EXCEPTIONS
General Limitations and Exceptions

Subject to the proposal, scope-of-services, and the related terms and conditions referenced in Section 1.0 of this Phase I ESA, AKT Peerless accepts responsibility for the competent performance of its duties in executing the assignment and preparing reports in accordance with the normal standards of the profession, but disclaims any responsibility for consequential damages.

Although AKT Peerless believes that the findings, opinions, and recommendations contained herein are reliable and appropriate, AKT Peerless cannot warrant or guarantee that the information provided is exhaustive, or that the information obtained from any data sources is complete or accurate.

Along with the inherent limitations set forth in various sections of ASTM Standard Practice E 1527-05, the accuracy and completeness of this report may be limited by the following facts or conditions:

- Due to the poor scale of the historical aerial photographs, the presence or absence of small features (e.g., individual drums, fuel dispensers) could not be discerned reliably.
- AKT Peerless made reasonable efforts to determine if USTs or related equipment (collectively referred to as UST systems) are or have been present at the subject property. AKT Peerless defines reasonable efforts as obtaining and evaluating information from visual observations of unobstructed areas and from the secondary sources cited in this report. AKT Peerless recognizes, and suggests users of this assessment acknowledge, that the accuracy of our conclusions relative to the on-site presence or use of UST systems may be directly affected by the presence of physical obstructions at the time of the reconnaissance, or affected by our receipt and evaluation of incorrect information.
- AKT Peerless’ evaluation of soil and groundwater features at and near the subject property was based only on published maps and other readily available information. AKT Peerless used this information to assess soil types and groundwater flow directions to determine if conditions at any nearby sites present an environmental threat to the subject property.
- Unless specifically noted otherwise, invasive investigation of any kind has not been performed during this Phase I ESA, nor has observation under floors, above ceilings, behind walls, within the surface and subsurface soil, within groundwater, within confined spaces, roof tops, or inaccessible areas been performed.
- AKT Peerless did not conduct sampling or analysis of air, soil, groundwater, surface water, or building materials as part of this Phase I ESA, unless specifically noted otherwise.
- This Phase I ESA did not include a physical inspection of the adjoining properties, which AKT Peerless observed from the subject property and from readily accessible public rights-of-way.
- AKT Peerless typically does not review historical or environmental information about nearby sites in detail unless known activities or events at a nearby site appear to present an environmental threat to the subject property.
AKT Peerless’ scope of services did not include conducting a review of property title documentation. AKT Peerless requested property title documentation and environmental cleanup liens from the Client, but was not provided this information, unless specifically noted otherwise. However, as described in this report, AKT Peerless made reasonable attempts to determine if the State Environmental Agency maintains documentation regarding environmental liens recorded against the subject property.

This assessment did not include a review or audit of operational environmental compliance issues, or of any environmental management systems, that may be associated with the subject property.

This Phase I ESA did not include any investigation or evaluation of issues not specifically related to petroleum products or hazardous substances as defined in CERCLA (i.e., other areas of potential business environmental risk such as radon, lead in drinking water, etc.).

The information and opinions contained in the report are given in light of this assignment. The report must be reviewed and relied upon only in conjunction with the terms and conditions expressly agreed-upon by the parties and as limited therein.

Although AKT Peerless believes the results contained in herein are reliable, AKT Peerless cannot warrant or guarantee that the information provided is exhaustive, or that the information provided by the Client, third parties, or the secondary information sources cited in this report is complete or accurate.

AKT Peerless is not in a position to provide an opinion regarding the Fair Market Value of the subject property. Therefore, a comparison of the purchase price of the subject property to other similar real estate transactions was not conducted during this assessment.

Nothing in this report constitutes a legal opinion or legal advice. For information regarding individual or organizational liability, AKT Peerless recommends consultation with independent legal counsel.

AKT Peerless relied upon specific or common knowledge of the Client, or information provided to the Client, to identify environmental liens, institutional controls, activity use limitations, or property valuation issues. As possible within the time frame and cost of this project, AKT Peerless looked for any obvious environmental information regarding these issues made readily available during the course of this ESA.

The information and opinions presented in this report are for the exclusive use of the Client. No distribution to or reliance by other parties may occur without the express written permission of AKT Peerless. AKT Peerless will not distribute this report without written consent from the Client, or as required by law or by a Court order.

Any third parties to whom the right to rely on the contents of this report have been granted by AKT Peerless, which is explicitly required prior to any third-party release, expressly agrees to be bound by the original terms and conditions entered into by AKT Peerless and the Client.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in bold italics are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 12/28/2011 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/11/2012 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states’ equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Quality’s Contaminated Sites List on Diskette With Address.

A review of the SHWS list, as provided by EDR, and dated 10/31/2012 has revealed that there are 9 SHWS sites within approximately 1 mile of the target property.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there is 1 Manufactured Gas Plants site within approximately 1 mile of the target property.

IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
PICKARD INDUSTRIAL PARK INC (Continued)

Registry ID: 110003565936

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through tracking of events and activities related to facilities that generate, transport, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA’s Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Telephone 312-886-6686
EPA Region 10 Telephone: 206-553-8665

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/07/2012

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Data Release Frequency: No Update Planned
Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/27/2011  Source: EPA
Date Data Arrived at EDR: 02/27/2012  Telephone: 703-412-9810

Number of Days to Update: 14  Next Scheduled EDR Contact: 03/11/2013
Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing
A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010  Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/11/2011  Telephone: 703-603-8704
Date Made Active in Reports: 02/16/2011  Last EDR Contact: 10/09/2012
Number of Days to Update: 36  Next Scheduled EDR Contact: 01/21/2013
Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time.
This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.
Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.
Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List
A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or affect human health.

Date of Government Version: 07/18/2012  
Source: Environmental Protection Agency  
Telephone: 703-603-0695

Date Data Arrived at EDR: 07/24/2012  
Date Made Active in Reports: 11/05/2012

Number of Days to Update: 104  
Next Scheduled EDR Contact: 03/25/2013  
Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls
A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 07/18/2012

Next Scheduled EDR Contact: 03/04/2013  
Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System
Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 04/02/2012  
Source: National Response Center, United States Coast Guard  
Telephone: 202-267-2180

Date Data Arrived at EDR: 04/03/2012  
Date Made Active in Reports: 06/14/2012

Number of Days to Update: 72  
Next Scheduled EDR Contact: 01/14/2013  
Data Release Frequency: Annually

State- and tribal - equivalent CERCLIS

SHWS: Contaminated Sites
State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 10/31/2012  
Source: Department of Natural Resources & Environment  
Telephone: 517-373-9541

Date Data Arrived at EDR: 11/01/2012  
Date Made Active in Reports: 11/28/2012

Number of Days to Update: 27  
Next Scheduled EDR Contact: 02/11/2013  
Data Release Frequency: Semi-Annually
State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Solid Waste Facilities Database
Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

- Date of Government Version: 10/01/2012

Data Release Frequency: Varies

INDIAN LUST R10: Leaking Underground Storage Tanks on Indian Land

Date of Government Version: 08/01/2012  Source: EPA Region 10
Date Data Arrived at EDR: 08/02/2012  Telephone: 206-553-2857
Date Made Active in Reports: 10/16/2012  Last EDR Contact: 10/30/2012
Number of Days to Update: 75  Next Scheduled EDR Contact: 02/11/2013
Data Release Frequency: Quarterly

State and tribal registered storage tank lists

UST: Underground Storage Tank Facility List
Registered Underground Storage Tanks. UST’s are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA) and must be registered with the state department responsible for administering the UST program. Available information varies by state program.

Date of Government Version: 08/06/2012  Source: Department of Natural Resources & Environment
Date Data Arrived at EDR: 08/22/2012  Telephone: 517-335-4035
Date Made Active in Reports: 09/20/2012  Last EDR Contact: 11/19/2012
Number of Days to Update: 29  Next Scheduled EDR Contact: 03/04/2013
Data Release Frequency: Annually

UST 2: Underground Storage Tank Listing
A listing of underground storage tank site locations that have unknown owner information.

Date of Government Version: 10/24/2011  Source: Department of Environmental Quality
Date Data Arrived at EDR: 11/23/2011  Telephone: 517-335-7211
Date Made Active in Reports: 01/09/2012  Last EDR Contact: 11/16/2012
Number of Days to Update: 47  Next Scheduled EDR Contact: 02/04/2013
Data Release Frequency: Annually

AST: Aboveground Tanks
Registered Aboveground Storage Tanks.
### INDIAN UST R4: Underground Storage Tanks on Indian Land
The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 4 (Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee and Tribal Nations).

INDIAN UST R6: Underground Storage Tanks on Indian Land
The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 6 (Louisiana, Arkansas, Oklahoma, New Mexico, Texas and 65 Tribes).

INDIAN UST R5: Underground Storage Tanks on Indian Land
The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 5 (Michigan, Minnesota and Wisconsin and Tribal Nations).

FEMA UST: Underground Storage Tank Listing
A listing of all FEMA owned underground storage tanks.

State and tribal institutional control / engineering control registries
AUL: Engineering and Institutional Controls
A listing of sites with institutional and/or engineering controls in place.

State and tribal voluntary cleanup sites
INDIAN VCP R1: Voluntary Cleanup Priority Listing
A listing of voluntary cleanup priority sites located on Indian Land located in Region 1.

INDIAN VCP R7: Voluntary Cleanup Priority Listing
A listing of voluntary cleanup priority sites located on Indian Land located in Region 7.
### State and tribal Brownfields sites

**BROWNFIELDS: Brownfields and USTfield Site Database**

All state funded Part 201 and 213 sites, as well as LUST sites that have been redeveloped by private entities using the BEA process. Be aware that this is not a list of all of the potential brownfield sites in Michigan.

### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

**US BROWNFIELDS: A Listing of Brownfields Sites**

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment.

Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HWSA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/11/2012  Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/04/2012  Telephone: 312-886-6186

Data Release Frequency: Annually

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010

Data Release Frequency: Every 4 Years

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009
Date Data Arrived at EDR: 04/16/2009
Date Made Active in Reports: 05/11/2009
Number of Days to Update: 25

Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Telephone: 202-566-1667
Last EDR Contact: 11/26/2012
Next Scheduled EDR Contact: 03/11/2013

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

### SSTS: Section 7 Tracking Systems
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

PADS: PCB Activity Database System

PCB Activity Database. PADS identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 11/01/2010  Source:  EPA
Date Arrived at EDR: 11/10/2010  Telephone: 202-566-0500
Date Made Active in Reports: 02/16/2011  Last EDR Contact: 10/19/2012
Number of Days to Update: 98  Next Scheduled EDR Contact: 01/28/2013
Data Release Frequency: Annually

MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 06/21/2011  Source:  Nuclear Regulatory Commission
Date Arrived at EDR: 07/15/2011  Telephone: 301-415-7169
Date Made Active in Reports: 09/13/2011  Last EDR Contact: 12/10/2012
Number of Days to Update: 60  Next Scheduled EDR Contact: 03/25/2013
Data Release Frequency: Quarterly

RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 10/02/2012  Source:  Environmental Protection Agency
Date Arrived at EDR: 10/02/2012  Telephone: 202-343-9775
Date Made Active in Reports: 11/05/2012  Last EDR Contact: 10/02/2012
Number of Days to Update: 34  Next Scheduled EDR Contact: 01/21/2013
Data Release Frequency: Quarterly

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/23/2011  Source:  EPA
Date Arrived at EDR: 12/13/2011  Telephone: (312) 353-2000
Date Made Active in Reports: 03/01/2012  Last EDR Contact: 12/11/2012
Number of Days to Update: 79  Next Scheduled EDR Contact: 03/25/2013
Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  Source:  EPA
Date Arrived at EDR: 07/03/1995  Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995  Last EDR Contact: 06/02/2008
Number of Days to Update: 35  Next Scheduled EDR Contact: 09/01/2008
Data Release Frequency: No Update Planned

BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.
UIC: Underground Injection Wells Database
A listing of underground injection well locations. The UIC Program is responsible for regulating the construction, operation, permitting, and closure of injection wells that place fluids underground for storage or disposal.

Date of Government Version: 11/01/2012
Date Data Arrived at EDR: 11/01/2012
Date Made Active in Reports: 11/28/2012
Number of Days to Update: 27

Last EDR Contact: 12/19/2012
Next Scheduled EDR Contact: 04/08/2013
Data Release Frequency: Varies

BEA: BASELINE ENVIRONMENTAL ASSESSMENT DATABASE
A Baseline Environmental Assessment (BEA) allows people to purchase or begin operating at a facility without being held liable for existing contamination. BEAs are used to gather enough information about the property being transferred so that existing contamination can be distinguished from any new releases that might occur after the new owner or operator takes over the property.

Date of Government Version: 08/20/2012
Date Data Arrived at EDR: 08/22/2012
Date Made Active in Reports: 09/20/2012

Last EDR Contact: 11/16/2012
Next Scheduled EDR Contact: 03/04/2013
Data Release Frequency: Semi-Annually

INDIAN RESERV: Indian Reservations
This map layer portrays Indian administered lands of the United States that have any area equal to or greater than 640 acres.
SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing
The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Data Release Frequency: Varies

2020 COR ACTION: 2020 Corrective Action Program List
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR PROPRIETARY RECORDS

EDR Proprietary Records
Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR’s researchers. Manufactured gas sites were used in the United States from the 1800’s to 1950’s to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)
Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.
Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
