North Third Street Improvements

North Third Street, Marquette

COMPLETED 2016

Project overview

The façade restorations in Marquette's North Third Street traditional commercial corridor helped transform buildings at 122 and 927 North Third Street. Improvements included new entries, windows, kitchen improvements, awnings, signage, addition of outdoor dining area, storefront windows, and historic transom window repair, tuck-pointing, and paint. The project leveraged private investment and improvements that increased taxable value within the corridor, lead to the creation of 11 new jobs, and added to the aesthetic appeal of the area for pedestrians and customers.

MEDC investment: \$188,750 Community Development Block Grant

Private investment: \$238,050
